

77% BioBased Material

Encapsulate

Your cost effective environmentally friendly solution to dust control!

Encapsulate™ is the product of choice for dust control. Eliminate dust by encapsulating the particles which cling to each other. It is biodegradable, safe for all users and will not interfere with asphalt or concrete mixes.

Why Encapsulate?

- Calcium chloride free, non-alkaline PH
- Easy to apply with long lasting effects
- Biodegradable, non-toxic microscopic coating
- No special spraying equipment needed
- Highly concentrated and economical
- Custom tailored to your needs
- Non-reactive to stone, concrete, or organic particles
- Dust particles cling to each other and onto larger surfaces
- Requires no water or mixing
- Safe on equipment, works in all temperatures
- Environmentally safe – 77% biobased material

Encapsulate Product Options:

#10 for use on light to moderately dusty roads

#20 for moderately dusty roads

#30 for extremely dusty conditions
